

# Integrated Debit/Credit Module

So many benefits with the swipe of a card

The integrated debit/credit module lets you manage **credit card**, **Interac** and **gift card** payments as well as payments made through **Accord D** financing. The program also handles **chip cards** and the main loyalty programs offered by our partners.

With the integrated credit/debit solution, essential transaction information is sent directly from the cash register to your banking institution.

Take advantage of this program with your **OGC-Plus** points of sale or your graphical **O<sup>2</sup>pos**.

## Offer ultra fast service at points of sale

- Serve more customers in less time.
- Reduce wait time at the cash register.
- Get a transaction confirmation in a matter of seconds.

## Ensure a secure experience for you and your clients

- Avoid manual entry errors (incorrect payment method upon invoicing, wrong amount entered into the bank terminal, duplicate entry, etc.).
- Reduce card and data handling: clients can swipe their card themselves.
- View previous transactions with the system integration of your data

## Save time and money

- Balance registers and close batches in a few seconds.
- Reduce paper handling: all data is automatically saved in the software.
- Reduce costs associated with the addition of new cards thanks to an adaptable solution in constant evolution.

*Reduce transaction times*

*Evolve along with new technologies*

*Conform to payment network standards*

*Ensure secure data transmissions*

*"Since our integrated debit/credit system has been installed, **there are no more line-ups**. Everybody saves time because it's fast. We can now eliminate 1 to 2 cash registers per day."*
